Mr. Kevin Fore  
Worldwide CAD Technology  
131 Brooks Street, Suite 400  
Sugar Land, TX 77478

Kevin,

I want to take a moment to provide you with feedback from our work with your company, Worldwide CAD Technology. Over the past three years, you have worked on over 600 drawings for our control modernization project including piping and instrumentation diagrams, wiring diagrams, motor schematics, and junction box drawings, along with drawings that required title block conversions. A number of these drawings required extensive work because the original files were TIF files (raster images) that had to be brought up to date in the form of AutoCAD files. During the project, I have been impressed with your company's ability to deliver high quality CAD services while being schedule and cost conscious. The experience that you have related to the electrical and instrumentation disciplines, coupled with your flexibility and responsiveness make you stand out from your competitors. It's been a pleasure working with you, and I look forward to working with you in the future.

Regards,

Alycia Ahrens  
Design Engineer II, Process Engineering/Process Safety Group  
Emerson Process Management Refining and Chemical Industry Center
