To: Kevin Fore

From: Blake Bryant
Sr. Electrical Engineer / Corporate Capital Projects Manager

Letter of Appreciation

Mr. Fore,

In my role as Sr. Electrical Engineer/ Project Manager at HUISH Detergents, Inc., I have been tasked with a wide variety of control system upgrade projects. These projects have ranged from small to large budgets. I would like to take the time to congratulate and commend you and your staff on an outstanding business relationship it was built with our company.

I find your service and competitive pricing to be excellent. Your staff has made sure our demands are always met down to the smallest detail. Excellent communication and leadership skills created a highly functional team who accomplished a tremendous amount of quality work in some very short timelines. The work is always performed to our satisfaction. You continue to do regular follow-ups to make sure we are completely satisfied and if there is a problem you fix it in a timely manner.

Your experience and expertise guided me to the successful completion of a very difficult task. I depended on you for coaching with regard to options of implementing databases and such as well as strategy and vision for future projects. The skill to "bridge the gap" between the technical and the functional make you an excellent facilitator between IT/CAD and the business. Rarely does a person possess this exceptional talent.

Overall, you and your staff was a tremendous contributor to the success of our project implementation. Your work ethic has been the highest level of honesty and integrity. The quality of work is consistently exceeds expectations. I highly recommend your staff and any resource that you endorse.

Thank you sincerely,

Blake Bryant
